PROFESSIONAL SUMMARY

Informatics graduate (S.Kom., 2026, GPA 3.24) with 3+ years as the sole Person in Charge of IT for a multi-department company: end-user support, MikroTik and Ruijie networks, site-to-site VPN, IP-PBX, CCTV and a TrueNAS SCALE backup server. BNSP-certified Web Developer who built a multi-role marketplace in Laravel and Next.js. Applied-AI builder: thesis on chili leaf disease identification with colour/texture features and K-Nearest Neighbors, plus three AI tools for image classification, helpdesk ticket triage and backup anomaly detection. Uses AI assistants such as Claude Code to deliver faster while keeping security and users first.

WORK EXPERIENCE

IT Support Specialist (Person in Charge, IT) Jun 2023 – Present
PT Gajah Unggul Internasional, Palembang

- Sole PIC for company-wide IT support, accountable end-to-end for infrastructure, network administration and end-user operations across departments.
- Deployed and maintain a TrueNAS SCALE storage server running scheduled company-wide backups, removing local workstations as the single point of failure for business data.
- Administer the network stack (MikroTik routers, managed switches, access points, Ruijie Cloud) and resolve connectivity incidents for on-site and remote users.
- Configured site-to-site VPN (WireGuard / IPsec) between branches and set up Yeastar IP-PBX telephony for internal communication.
- Led data migration for a new business-system rollout, moving operational data across platforms without downtime or data loss.
- Install, configure and patch hardware and software fleet-wide; deliver CCTV / IP-camera installation and preventive maintenance schedules.
- Handle daily user tickets (hardware, software, network, email, printers), prioritise them by business impact and fix root causes to reduce repeat incidents.

Graphic Designer Sep 2022 – Mar 2023
Clemen Baby Shop, Palembang

- Designed product visuals and marketplace assets for Shopee, Tokopedia and Instagram that supported the brand's online sales.
- Produced short-form video (TikTok, Reels, YouTube Shorts) end to end: concept, storyboard, editing, motion graphics and export.

Technician Intern Dec 2021 – Jan 2022
Bobby Komputer, Palembang

- Assembled custom PCs to customer specifications, installed Windows and productivity software, and carried out on-site fibre-optic internet installations.

EDUCATION

Bachelor of Computer Science (S.Kom.), Informatics Aug 2022 – Mar 2026
Universitas Multi Data Palembang | GPA 3.24 / 4.00 (Very Satisfactory) | Program accredited by LAM-INFOKOM

- Thesis: Colour and Texture Feature Extraction for Chili Leaf Disease Identification using K-Nearest Neighbors.
- Relevant coursework: Artificial Intelligence (A), Data Science (A), Digital Image Processing (A), Database Systems II (A), Software Engineering (A), Object-Oriented Programming (A), Cloud Infrastructure & Services (A), Computer Security (A), Machine Learning.

SKILLS

Infrastructure & Networking: MikroTik (Winbox), Ruijie Cloud, WireGuard / IPsec VPN, LAN/WAN troubleshooting, TrueNAS SCALE, Nextcloud, Yeastar IP-PBX, CCTV / IP cameras
Systems Administration: SSH (PuTTY), FileZilla, AnyDesk, Remote Desktop, scheduled backups, data migration, Windows deployment
Web & Programming: PHP, Laravel, JavaScript (ES6, AJAX), TypeScript, Next.js, React, Prisma, Tailwind CSS, HTML5, CSS3, MySQL / MariaDB, SQL, Kotlin, REST APIs, Leaflet / OpenStreetMap, WhatsApp API, Git
AI & Data: K-Nearest Neighbors, Naive Bayes, feature extraction (colour, GLCM texture), TF-IDF retrieval, anomaly detection, Python, Claude / Claude Code, prompt engineering
Enterprise & Governance: SAP S/4HANA (Fiori) fundamentals, user acceptance testing, information-security risk, change impact analysis
Design & UI/UX: Figma (wireframes, prototypes, figma.com/@andreyas3667), Adobe Photoshop, Illustrator, Premiere Pro, After Effects, CapCut
Languages: Indonesian (native), English (professional working proficiency)

PROJECTS

CabaiScan - Chili Leaf Disease Identifier (Personal, 2026) | JavaScript, Canvas API, HSV histograms, GLCM texture, KNN

- Web implementation of the thesis method: extracts colour (HSV histogram) and texture (GLCM contrast, homogeneity, energy, correlation) features from a leaf photo and classifies it with K-Nearest Neighbors.
- Runs fully in the browser; reports leave-one-out cross-validation accuracy and shows the extracted features and the k nearest neighbours behind each prediction.

TanyaIT - AI Helpdesk Assistant (Personal, 2026) | JavaScript, NLP, TF-IDF retrieval, Naive Bayes

- Helpdesk tool based on real IT-support cases: understands Indonesian complaints (tokenizer, stemmer, slang dictionary), retrieves the most relevant troubleshooting article (MikroTik, VPN, NAS, printer, email) for a user's complaint and drafts a step-by-step answer.
- Classifies each ticket's category and priority with a multinomial Naive Bayes model, explains which words drove the decision and learns from agent corrections.

BackupWatch - Backup Anomaly Monitor (Personal, 2026) | JavaScript, robust statistics (median / MAD z-score), SVG charts

- Dashboard that reads backup job logs (CSV) and flags failed jobs, sudden size drops or spikes, long runtimes and missed schedules, the early signs of a failing or ransomware-hit backup.
- Modelled on the TrueNAS SCALE backup routine run in production at work; every alert comes with a plain-language explanation.

Kopi Sriwijaya: UMKM Coffee Marketplace & Mapping Platform (Field Practicum, 2025–2026) | Laravel 12, PHP, MySQL; rebuilt in Next.js, TypeScript, Prisma, NextAuth, Leaflet, Recharts

- Built a platform connecting South Sumatra coffee SMEs (UMKM) with buyers, administered by the provincial SME office: interactive Leaflet/OpenStreetMap map of producers, product catalogue with coffee metadata, and WhatsApp ordering with orders stored in the database.
- Implemented three roles (buyer, UMKM, admin) with dashboards, revenue charts, server-side stock validation in atomic transactions, bulk CSV import and PDF/Excel/CSV report export.
- Rebuilt the original Laravel 12 app in Next.js + TypeScript + Prisma for type safety, cleaner data access and simpler deployment.

Library Management Information System (Academic, 2024) | PHP, MySQL, HTML, CSS

- Built a library system from scratch (books, members, loans) with foreign-key and cascading rules that keep inventory and transaction records consistent.

AI Content Production Pipeline (Personal, 2026) | Claude, ElevenLabs / Edge-TTS, AI video generation, CapCut

- Designed a repeatable pipeline that turns source material into finished short-form videos by chaining AI tools for scripting, voice-over and visuals, with fixed constraints for duration, hook and pacing.

UI/UX Design Case Studies (Coursework, 2024) | Figma: wireframes, interactive prototypes, heuristic evaluation

- Designed user flows and high-fidelity Figma prototypes for a Human-Computer Interaction project and a Software Engineering final exam, checked against Nielsen's heuristics and contrast guidelines (figma.com/@andreyas3667).

CERTIFICATIONS

Certificate of Competence - Web Developer (ICT Project Manager field) Mar 2026 – Mar 2029

BNSP via LSP Universitas Multi Data Palembang

22 competency units incl. SQL, debugging, UAT, information-security risk, migration to new technology, software scalability and project scope/quality.

Introduction to SAP S/4HANA with Global Bike Inc. using SAP Fiori Sep 2024 – Jan 2025

SAP × Universitas Multi Data Palembang

Certificate of participation covering end-to-end ERP business processes in S/4HANA.
