SUMMARY

Informatics graduate (S.Kom., 2026, GPA 3.24) with 3+ years as the Person in Charge of a company's IT: MikroTik and Ruijie networks, site-to-site VPN, IP-PBX, CCTV and a TrueNAS SCALE backup server I deployed. BNSP-certified Web Developer who has shipped a multi-role marketplace in Laravel and Next.js, and an applied-AI builder: my thesis used colour and texture features with K-Nearest Neighbors to identify chili leaf diseases, and I have deployed three AI tools (image classification, helpdesk triage, backup anomaly detection). I use Claude Code to ship faster without cutting corners on security or users.

EXPERIENCE

IT Support Specialist — Person in Charge (PIC), IT Support Jun 2023 – Present
PT Gajah Unggul Internasional, Palembang

- Sole PIC for company-wide IT support, accountable end-to-end for infrastructure, network administration and end-user operations across departments.
- Deployed and maintain a TrueNAS SCALE storage server running scheduled company-wide backups, removing local workstations as the single point of failure for business data.
- Administer the network stack (MikroTik routers, managed switches, access points, Ruijie Cloud) and resolve connectivity incidents for on-site and remote users.
- Configured site-to-site VPN (WireGuard / IPsec) between branches and set up Yeastar IP-PBX telephony for internal communication.
- Led data migration for a new business-system rollout, moving operational data across platforms without downtime or data loss.
- Install, configure and patch hardware and software fleet-wide; deliver CCTV / IP-camera installation and preventive maintenance schedules.
- Triage concurrent daily user tickets by business impact and fix root causes to reduce repeat incidents.

Graphic Designer Sep 2022 – Mar 2023
Clemen Baby Shop, Palembang

- Designed product visuals and marketplace assets for Shopee, Tokopedia and Instagram that supported the brand's online sales.
- Produced short-form video (TikTok, Reels, YouTube Shorts) end to end: concept, storyboard, editing, motion graphics and export.

Technician Intern Dec 2021 – Jan 2022
Bobby Komputer, Palembang

- Assembled custom PCs to customer specifications, installed Windows and productivity software, and carried out on-site fibre-optic internet installations.

PROJECTS

CabaiScan — Chili Leaf Disease Identifier | JavaScript, Canvas API, HSV histograms, GLCM texture, KNN

- Browser implementation of my thesis method: extracts colour (HSV histogram) and texture (GLCM contrast, homogeneity, energy, correlation) features from a leaf photo and classifies it with K-Nearest Neighbors.
- Runs fully client-side; users can train on their own labelled images, inspect every extracted feature and see the k nearest neighbours behind each prediction.

TanyaIT — AI Helpdesk Assistant | JavaScript, TF-IDF retrieval, Naive Bayes, Local Storage

- Helpdesk tool built from my IT-support work: retrieves the most relevant troubleshooting article (MikroTik, VPN, NAS, printer, email) for a user's complaint and drafts a step-by-step answer.
- Automatically classifies each ticket's category and priority with a Naive Bayes model, and shows which words drove the decision.

BackupWatch — Backup Anomaly Monitor | JavaScript, statistics (z-score / IQR), SVG charts

- Dashboard that reads backup job logs (CSV) and flags anomalies such as sudden size drops, long runtimes or missed schedules, the early signs of a failing or tampered backup.
- Modelled on the TrueNAS SCALE backup routine I run in production; includes sample data and an explanation for every alert.

Kopi Sriwijaya: UMKM Coffee Marketplace & Mapping Platform (Field Practicum, 2025–2026) | Laravel 12, PHP, MySQL; rebuilt in Next.js, TypeScript, Prisma, NextAuth, Leaflet, Recharts

- Built a platform connecting South Sumatra coffee SMEs (UMKM) with buyers, administered by the provincial SME office: interactive Leaflet/OpenStreetMap map of producers, product catalogue with coffee metadata, and WhatsApp ordering with orders stored in the database.
- Implemented three roles (buyer, UMKM, admin) with dashboards, revenue charts, server-side stock validation in atomic transactions, bulk CSV import and PDF/Excel/CSV report export.
- Rebuilt the original Laravel 12 app in Next.js + TypeScript + Prisma for type safety and simpler deployment (github.com/Andreyas3667/kopi-sriwijaya).

Library Management Information System (Academic, 2024) | PHP, MySQL, HTML, CSS

- Built a library system from scratch (books, members, loans) with foreign-key and cascading rules that keep inventory and transaction records consistent.

AI Content Production Pipeline (Personal, 2026) | Claude, ElevenLabs / Edge-TTS, AI video generation, CapCut

- Designed a repeatable pipeline that turns source material into finished short-form videos by chaining AI tools for scripting, voice-over and visuals, with fixed constraints for duration, hook and pacing.

UI/UX Design Case Studies (Coursework, 2024) | Figma: wireframes, interactive prototypes, heuristic evaluation

- Designed user flows and high-fidelity Figma prototypes for a Human-Computer Interaction project and a Software Engineering final exam, checked against Nielsen's heuristics and contrast guidelines (figma.com/@andreyas3667).

EDUCATION

Bachelor of Computer Science (S.Kom.), Informatics Aug 2022 – Mar 2026

Universitas Multi Data Palembang | GPA 3.24 / 4.00 (Very Satisfactory) | Program accredited by LAM-INFOKOM

- Thesis: Colour and Texture Feature Extraction for Chili Leaf Disease Identification using K-Nearest Neighbors.
- Relevant coursework: Artificial Intelligence (A), Data Science (A), Digital Image Processing (A), Database Systems II (A), Software Engineering (A), Object-Oriented Programming (A), Cloud Infrastructure & Services (A), Computer Security (A), Machine Learning.

CERTIFICATIONS

Certificate of Competence — Web Developer (ICT Project Manager field) Mar 2026 – Mar 2029

BNSP via LSP Universitas Multi Data Palembang

22 competency units incl. SQL, debugging, UAT, information-security risk, migration to new technology, software scalability and project scope/quality.

Introduction to SAP S/4HANA with Global Bike Inc. using SAP Fiori Sep 2024 – Jan 2025

SAP × Universitas Multi Data Palembang

Certificate of participation covering end-to-end ERP business processes in S/4HANA.

SKILLS

Infrastructure & Networking: MikroTik (Winbox), Ruijie Cloud, WireGuard / IPsec VPN, LAN/WAN troubleshooting, TrueNAS SCALE, Nextcloud, Yeastar IP-PBX, CCTV / IP cameras

Systems Administration: SSH (PuTTY), FileZilla, AnyDesk, Remote Desktop, scheduled backups, data migration, Windows deployment

Web & Programming: PHP, Laravel, JavaScript (ES6, AJAX), TypeScript, Next.js, React, Prisma, Tailwind CSS, HTML5, CSS3, MySQL / MariaDB, SQL, Kotlin, REST APIs, Leaflet / OpenStreetMap, WhatsApp API, Git

AI & Data: K-Nearest Neighbors, Naive Bayes, feature extraction (colour, GLCM texture), TF-IDF retrieval, anomaly detection, Python, Claude / Claude Code, prompt engineering

Enterprise & Governance: SAP S/4HANA (Fiori) fundamentals, user acceptance testing, information-security risk, change impact analysis

Design & UI/UX: Figma (wireframes, prototypes, figma.com/@andreyas3667), Adobe Photoshop, Illustrator, Premiere Pro, After Effects, CapCut

Languages: Indonesian (native), English (professional working proficiency)
