SUMMARY

Informatics graduate (S.Kom., 2026) and BNSP-certified Web Developer who has kept a company's systems running for over three years. I build PHP/MySQL applications with third-party integrations (OpenStreetMap, WhatsApp) and bring a production mindset from IT operations: backups, security and users who need things to just work. I use AI tooling such as Claude Code to ship faster without cutting corners.

EXPERIENCE

IT Support Specialist — Person in Charge (PIC), IT Support Jun 2023 – Present
PT Gajah Unggul Internasional, Palembang

- Sole PIC for company-wide IT support, accountable end-to-end for infrastructure, network administration and end-user operations across departments.
- Led data migration for a new business-system rollout, moving operational data across platforms without downtime or data loss.
- Deployed and maintain a TrueNAS SCALE storage server running scheduled company-wide backups, removing local workstations as the single point of failure for business data.
- Administer the network stack (MikroTik routers, managed switches, access points, Ruijie Cloud) and resolve connectivity incidents for on-site and remote users.
- Triage concurrent daily user tickets by business impact and fix root causes to reduce repeat incidents.

Graphic Designer Sep 2022 – Mar 2023
Clemen Baby Shop, Palembang

- Designed product visuals and marketplace assets for Shopee, Tokopedia and Instagram that supported the brand's online sales.
- Produced short-form video (TikTok, Reels, YouTube Shorts) end to end: concept, storyboard, editing, motion graphics and export.

Technician Intern Dec 2021 – Jan 2022
Bobby Komputer, Palembang

- Assembled custom PCs to customer specifications, installed Windows and productivity software, and carried out on-site fibre-optic internet installations.

PROJECTS

Coffee SME Sales & Mapping Platform (Field Practicum, 2025) | PHP, MySQL, JavaScript (AJAX), OpenStreetMap, WhatsApp Click-to-Chat

- Built a full-stack platform for small coffee producers (UMKM) to list products, with an interactive OpenStreetMap of registered vendors.
- Designed the relational schema and secure CRUD with prepared statements; orders open a pre-filled WhatsApp chat to match how local sellers already transact.

TanyaIT — AI Helpdesk Assistant | JavaScript, TF-IDF retrieval, Naive Bayes, Local Storage

- Helpdesk tool built from my IT-support work: retrieves the most relevant troubleshooting article (MikroTik, VPN, NAS, printer, email) for a user's complaint and drafts a step-by-step answer.
- Automatically classifies each ticket's category and priority with a Naive Bayes model, and shows which words drove the decision.

CabaiScan — Chili Leaf Disease Identifier | JavaScript, Canvas API, HSV histograms, GLCM texture, KNN

- Browser implementation of my thesis method: extracts colour (HSV histogram) and texture (GLCM contrast, homogeneity, energy, correlation) features from a leaf photo and classifies it with K-Nearest Neighbors.
- Runs fully client-side; users can train on their own labelled images, inspect every extracted feature and see the k nearest neighbours behind each prediction.

Library Management Information System (Academic, 2024) | PHP, MySQL, HTML, CSS

- Built a library system from scratch (books, members, loans) with foreign-key and cascading rules that keep inventory and transaction records consistent.

EDUCATION

Bachelor of Computer Science (S.Kom.), Informatics Aug 2022 – Mar 2026
Universitas Multi Data Palembang | GPA 3.24 / 4.00 (Very Satisfactory) | Program accredited by LAM-INFOKOM

- Thesis: Colour and Texture Feature Extraction for Chili Leaf Disease Identification using K-Nearest Neighbors.
- Relevant coursework: Artificial Intelligence (A), Data Science (A), Digital Image Processing (A), Database Systems II (A), Software Engineering (A), Object-Oriented Programming (A), Cloud Infrastructure & Services (A), Computer Security (A), Machine Learning.

CERTIFICATIONS

Certificate of Competence — Web Developer (ICT Project Manager field) Mar 2026 – Mar 2029
BNSP via LSP Universitas Multi Data Palembang
22 competency units incl. SQL, debugging, UAT, information-security risk, migration to new technology, software scalability and project scope/quality.

Introduction to SAP S/4HANA with Global Bike Inc. using SAP Fiori Sep 2024 – Jan 2025
SAP × Universitas Multi Data Palembang
Certificate of participation covering end-to-end ERP business processes in S/4HANA.

SKILLS

Web & Programming: PHP, JavaScript (ES6, AJAX), HTML5, CSS3, MySQL / MariaDB, SQL, Kotlin, REST APIs, OpenStreetMap / Leaflet, WhatsApp API, Git
AI & Data: K-Nearest Neighbors, Naive Bayes, feature extraction (colour, GLCM texture), TF-IDF retrieval, anomaly detection, Python, Claude / Claude Code, prompt engineering
Design & UI/UX: Figma (wireframes, prototypes), Adobe Photoshop, Illustrator, Premiere Pro, After Effects, CapCut
Infrastructure & Networking: MikroTik (Winbox), Ruijie Cloud, WireGuard / IPsec VPN, LAN/WAN troubleshooting, TrueNAS SCALE, Nextcloud, Yeastar IP-PBX, CCTV / IP cameras
Languages: Indonesian (native), English (professional working proficiency)
